Company Profile

Who We Are

Costar Plastics is a plastic houseware manufacturer based in Zhejiang, China. We design and produce plastic organizers, kitchen storage, cleaning accessories and catering supplies for wholesalers, importers and retail brands worldwide.

Our factory runs 11 injection molding machines with shot weights from 100 grams to 800 grams, which covers small household items as well as larger storage boxes and serving trays. In-house tooling support allows us to quote molds from your drawings and dimensions, then move straight from sampling to mass production.

We work with customers on two levels: sourcing from our existing mold library with your logo or packaging, or developing an entirely new item from a drawing or a sample. Both paths are supported with sampling, certification documents and shipping coordination.

FACTORY
